What to do prior to beginning your import

Before you begin your import

- Complete the consensus form in all of your included studies
- Included studies must have study IDs (#12 Brown 2024)
- Enable Study-centric data in RevMan Web
- Add interventions and outcome names to RevMan Web
- Add Identification as a user defined Characteristic
- Set up your analyses (optional)
- Import the references from Covidence

DEMONSTRATION

Export files from Covidence

Steps to export data from Covidence to RevMan Web

Export csv files from Covidence:

- **Study information**
- **Study arms**
- **Study results**
- Risk of bias (RoB 1)
- Custom data

DEMONSTRATION

What does Covidence not support?

- RoB 2
- Custom data direct import
- Direct reference import
- Automatic population of subgroup data

Some FAQs

How are timepoints handled if I've added them into Covidence?
